Choose Color Contrast

Review: The artwork has some contrast in colors, such as the dark horse against the lighter background and the blue water against the yellow-green land. However, the contrast is not used effectively to enhance the overall appeal of the piece.

Suggestion: Consider using more distinct and contrasting colors for different elements of the artwork to create a more striking visual impact. For example, using a brighter color for the horse's mane or a more contrasting background can help make the main subject stand out more.
